

## a global vision for software testing

# WEBCHECK

The Webcheck testing service is delivered under a fixed price, with a focus on the functional validation of a website. The service can be tailored to suit your needs from components including:

- Functional Testing
- Usability Testing
- W3C compliance
- HTML standards assurance
- Accessibility Testing.

The engagement starts with a simple, fixed price quote for the scope of work. Once this is agreed our off-shore team in Bangalore will then schedule the Webcheck to ensure that it is done at an appropriate time, when the site is stable. Note: all changes to your website should be stopped during the testing phase.

The normal length of time for the service is 2 to 5 elapsed days, depending on the scope of work. All work is carried out to an exceptionally high industry standard with the inclusion of both automated tools and certified test professionals.

At the end of the test phase a Webcheck report will be issued, summarising the 'health' of the site and any defects identified during the testing phase.

The Webcheck team can be made available to assist with any retesting, once the defects have been rectified.

"Clients typically engage with the Webcheck service when they are putting a new website live, or making significant changes. They recognise that to a great many customers the web presence of their company is paramount.

Some Clients chose to retain the service for regular testing and therefore to provide peace of mind on the quality of the site. This Webcheck is then incorporated into an overall release strategy."

**Stewart Noakes**  
Chairman, TCL India & TCL Group

### Key Benefits of this service include

- Improved customer experience on the website leading to more contacts, leads and sales
- Consistent quality of the website functionality
- Enhanced search engine inclusion and listings
- Improved website integrity and security.

The cost of a TCL Webcheck is contingent upon the scope of works and complexity of the site. Typically the service costs are between £500 and £1500.
