

a global vision for software testing

TCL AND UTEST 'TEST-OFF' AT SIGIST

London, UK, 14th December 2011 - The Test-Off returns to SIGIST by popular demand. Run by TCL, the workshop style event gave testers a chance to enjoy some hands-on testing by taking part in this competitive session to test Disney's Kerpoof.com.

It was a great chance for the testers to show off their bug-hunting skills, as few functional defects existed in the application and the many usability bugs encountered were deemed out of scope by the team of judges.

As the competitive spirit kicked in, the event also explored themes of teamwork, communication and measuring success within a test environment, sparking debates on testing methods. Whilst entertainment was paramount, the learning and teamwork aspects of the Test-Off fitted in well with SIGIST, an event where you can hear high-quality speakers within a friendly environment. Both are perfect opportunities for networking with fellow testers and learning from each other.

The Test-Off is akin to TCL's regular Zappers events. Zappers is a meet up where testers, both experts and amateurs, come together to make connections, compete and, of course, enjoy themselves. You can sign up today at www.zappers-community.com to register for an event. For more information about these events, or to have your product featured, contact holly.baynton@tcl.eu.com.

Notes to Editor

About TCL and uTest

Transition Consulting Limited (TCL) is a consultancy specialising in Software testing. Our core purpose is to Develop and Deliver World Class Solutions in Software Testing that are Innovative, Structured and Professional. TCL are geared to deliver in all areas of software testing, from Unit Testing to Performance Testing, and everything in between.

TCL is a UK partner for uTest, the world's largest marketplace for testing web sites as well as desktop, mobile and gaming software applications. uTest utilises a crowdsourcing model for providing testing services in an efficient and cost-effective manner.
