

a global vision for software testing

TCL Supports School Sports Initiative in Exeter

Exeter, UK, 29th November 2011 - TCL sponsor Exeter's Sports Volunteering Scheme, helping to support and develop local young people.

Students at the University of Exeter are volunteering in schools throughout the Exeter area with the University's Sports Volunteering Scheme. Matt Upston, PE Teacher at St Luke's Science and Sports College, commented on the initiative, "The project's partnership between the Schools and University of Exeter students has encouraged development of the skills and opportunities of all involved. The students are really positive role models for our pupils and encourage an active lifestyle beyond curriculum PE lessons."

The scheme is generously sponsored by TCL, who have strong links to the University with an office based within the University Grounds. TCL wanted to support the scheme because of its avid interest in the development of young people and recognition of the project's positive impact in the community.

Stewart Noakes, Chairman of TCL, commented that "It was an easy choice for us to sponsor the Sports Volunteering Scheme. We are an organisation that is passionate about developing people and helping them to unlock their potential – qualities which this scheme encourages from both school pupils and University students alike."

About TCL Software Testing Solutions

Transition Consulting Limited (TCL) is a consultancy specialising in Software testing. Our core purpose is to Develop and Deliver World Class Solutions in Software Testing that are Innovative, Structured and Professional.
