

a global vision for software testing

TCL launches operations in Switzerland

TCL continues international expansion with announcement of new Swiss office

Zug, Switzerland – March 1, 2010 - [TCL](#), a leading software testing consultancy, today announced the expansion of its global capabilities with the launch of a new operation in Zug, Switzerland. The expansion enables TCL to supply a UK trained resource solution to the Swiss software testing market.

Transition Consulting GmbH is led by Tony Prosser, co-founder and Director of TCL Group Ltd. who brings with him many years of extensive and diverse experience in Software Testing. TCL will leverage its local presence and existing business links from its new office in central Switzerland to offer a solution to the high demand for UK testers.

“TCL came to Switzerland to assist an old colleague in need of top quality testing support. We liked what we found and recognised that there was a distinct shortage of technical skills that we could bring to the market. The training and experience that exist in the UK Testing Arena are lacking in the Swiss market, we intend to help change that by seeding high quality experienced testers into Transition Consulting GmbH and to build from there. Switzerland is a very exciting and buoyant market in which there is a need to supplement specialist skills for the foreseeable future, we intend to fill that gap”

Tony Prosser, Director - TCL Group Ltd

“We have spent the last 5 or 6 months getting the infrastructure and support functions right. As with anything we do at TCL it is all about building sustainable, professional longevity. We have not wanted to expand our consultant or client base until we had these things in place. We now have these and are ready to fully support the market opportunity that exists here. It is going to be a very exciting year.”

Transition Consulting GmbH Offers:

- Highly trained, experienced and capable Software Testing Consultants
- Competitive Rates with low cost of ownership
- Experience in the Financial, Telecoms, Retail (Including Web Channel), Government and Energy Sectors
- Engagement models from 1 day consultancy through to outsourced testing

We take pride in our ability to provide custom tailored test, software and management solutions. We empower our clients, so that they can realise and meet their goals.
